

Environmental Policy

PMP Montex s.r.o. management is aware that implementations of all business plans and services can have either direct or indirect impact on the environment. The management attempts to control all operations in order to protect its employees and environments, and to contribute to environmental conservation and sustainable development.

Regarding the fact, the environmental care is an important task of the entire company; PMP Montex s.r.o. promotes the following measures of Environmental Policy:

- Environmental requirements of current valid rules, laws and regulations are met.
- While performing excessive creation of waste, air, water and soil pollution is prevented; the negative environmental impacts are minimized.
- Use of energies, water, bought materials and other resources is economised.
- The environment is protected and improved by using environment-friendly materials; products and progressive technologies used are considerate of the environment.
- PMP Montex s.r.o. takes precautionary measures, educating staff's awareness on Environmental Care.
- The environmental issues are communicated by staff, concerned parties and state agencies.
- Active approach to Environmental Protection is required from all business partners.
- Preventive care is treated with priority, that is fore fronted to following measures. In case of emergency we follow emergency plans to ensure minimization of environmental risks.

Environmental Policy measures are valid since the date of proclamation. The Policy is mandatory to all PMP Montex s.r.o. staff.
